

NANO INDUCT™

The FIRST Induct Air Purifier with Rotational UV Shield Technology.

AHPCO Technology

Replicating Nature and The Sun

Step 1.

Ions are Created from UV Light

The **UVC lamp** destroys germs that pass by. Redundant air-cleansing ions are then formed from water vapor when rays of light from the **UVC lamp** excite the **AHPCO Catalyst**.

Step 2.

Bacteria, Viruses, VOCs & Other Pollutants are Destroyed

Redundant ions **actively** seek out pollutants and break them down. They are neutralized as the contaminants are destroyed.

Step 3.

Harmless By-products of Water Vapor

Ions revert back to harmless water vapor and the cycle repeats, thereby reducing additional contaminants.
